Profile Summary

I am a **Computer Science undergraduate** with experience in **Flutter mobile development**, backend API development, and machine learning applications. Proficient in **Flutter, Firebase, Python, Flask, MongoDB, and n8n automation**. Experienced in delivering **freelance software solutions**, developing cross-platform mobile applications, backend systems, and automation workflows with a focus on scalable and efficient application design.

Projects

Attendance System

Github

- Built a QR and face recognition-based attendance system using Python, Flask, and OpenCV, enabling automated student attendance with secure identity verification.
- Tools used: Python, Flask, OpenCV, SQLite, Computer Vision

n8n Automation

n8n Platform

- Developed an AI-powered image and video generation system to create customized promotional content for marketing campaigns based on company, target audience, and industry.
- Built an n8n automation pipeline integrating speech-to-text transcription, NLP topic analysis, and automated summary generation to analyze voice interactions and extract actionable insights.
- Tools used: n8n, Replicate, OpenAI, Kie AI, AWS Server

Machine Learning for Analytics

2024

- Engineered an ECG and health monitoring system to detect and provide early alerts for cardiac and other physiological abnormalities.
- Engineered and deployed an interactive machine learning model with Streamlit to detect cancer from various parameters, improving diagnostic speed.
- Tools used: Python, Kaggle, Streamlit, Google Colab

Flutter Apps

2025

- Designed and built a Flutter-based cab tracking system with real-time GPS tracking, ETA notifications, and a dispatcher dashboard for trip and vehicle management.
- Built a cross-platform Flutter app for a freelance client with Admin and Field Officer modules for visit tracking and reporting, integrated with Firebase backend services and ML-based plant disease detection.
- Tools used: Flutter, Firebase, Google Cloud, OpenAI API

Technical Skills

Programming Languages: Dart, Python, C++, SQL, HTML, CSS, JavaScript

Technologies: Flutter, Firebase, Flask, FastAPI, n8n, AWS Hosting, Postman, MongoDB, PostgreSQL, Figma, GitHub Actions for CI/CD, Git, Machine Learning, Docker, Linux

Experience

Industrial Experience Program

Pune & Hyderabad, India

- Participated in an industrial visit organized by the college, gaining exposure to real-world industry operations and technology practices.
- Visited organizations including T-Hub, BSNL, and L&T to understand industry workflows, innovation ecosystems, and large-scale engineering operations.
- Interacted with professionals and observed practical applications of telecommunications, incubation of startups, and engineering project management.

Freelance Flutter Developer

Remote | Currently Working

- Developed cross-platform Flutter applications for clients, implementing features such as real-time GPS tracking, visit logging, and reporting systems.
- Built mobile solutions integrated with Firebase services including authentication, database, and cloud functions.
- Implemented machine learning integration for plant disease detection within a field officer reporting application.

Education

VIT Bhopal University, B.Tech in Computer Science 2027

- GPA: 8.04 (as of January 2026)
- **Coursework:** Data Structures and Algorithms, Operating Systems, Database Management Systems, Computer Networks, Computer Architecture, Design and Analysis of Algorithms, Software Engineering

Birla School Pilani, 12th - CBSE 2023

Birla School Pilani, 10th - CBSE 2021

Certificates

Microsoft Azure, Azure Data Fundamentals 2025

Position Of Responsibility

Musical Head, Head of Organizing 2018

Additional Information

Skills:

- Project Management
- Teamwork
- Time Management
- Effective Communication

Hobbies:

- Football
- Running
- Photography

Languages:

- English
- Hindi
