Profile Summary

Computer Science undergraduate student with hands-on experience in mobile application development, backend APIs and data-driven solutions, including machine learning applications. Delivered freelance software solutions, building cross-platform apps, scalable backend systems, and automation workflows. Passionate about building efficient, scalable, and user-focused software systems.

Projects

Attendance System

Github

- Built a QR and face recognition-based attendance system using Python, Flask, and OpenCV, achieving 92% recognition accuracy for secure identity verification.
- Integrated QR-based authentication with backend APIs for attendance logging and data management.

FastAPI Image Service

2026

- Developed an image upload and compression service using FastAPI with hybrid (client-side and server-side) optimization using Pillow, reducing image size by up to 70% and improving upload performance by around 35%.
- Designed and implemented RESTful APIs and integrated AWS S3 for scalable image storage and retrieval.

Flutter Applications

2025

- Developed a real-time cab tracking system using Flutter, implementing GPS-based location tracking, ETA estimation, and a dispatcher dashboard for trip management.
- Built a cross-platform Flutter application for a freelance client with role-based modules (Admin and Field Officer), integrating Firebase services for authentication, database, and cloud functions.
- Integrated a google services for easy access and management.

Technical Skills

Programming Languages: Python, C++, Dart, SQL, HTML, CSS

Frameworks & Tools: Flutter, Flask, FastAPI, Firebase, n8n, Docker, Git, CI/CD (GitHub Actions)

Databases: MongoDB, PostgreSQL, MySQL

Cloud & Platforms: AWS, Google Cloud, Linux, Postman

Machine Learning: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, PyTorch (Learning)

Core Concepts: Machine Learning, OOPs, REST API Design, Database Design, System Design (Learning)

Experience

Industrial Experience Program

Pune & Hyderabad, India

- Participated in an industrial visit organized by the college, gaining exposure to real-world industry operations and technology practices.
- Visited organizations including T-Hub, BSNL, and L&T to understand industry workflows, innovation ecosystems, and large-scale engineering operations. Interacted with professionals and observed practical applications of telecommunications, incubation of startups, and engineering project management.

Freelance Flutter Developer

Remote | Currently Working

- Developed cross-platform Flutter applications for clients, implementing features such as real-time GPS tracking, visit logging, and reporting systems.
- Built mobile solutions integrated with Firebase services including authentication, database, and cloud functions.
- Implemented machine learning integration for plant disease detection within a field officer reporting application.

Education

VIT Bhopal University, B.Tech in Computer Science	2027
• CGPA: 8.23 (as of August 2026)	
Birla School Pilani, 12th - CBSE	2023
Birla School Pilani, 10th - CBSE	2021

Certificates

Microsoft Azure, Azure Data Fundamentals	2025
--	------

Position Of Responsibility

Musical Head, Head of Organizing	2018
----------------------------------	------

Additional Information

Skills:

- Project Management
- Teamwork
- Effective Communication

Hobbies:

- Football
- Running
- Photography

Languages:

- English
- Hindi
